SUMMARY

Dedicated and results-driven full-stack engineer who builds high quality web applications that are user-focused and very efficient. Have 3+ years of experience in building, designing and implementing web products using various technologies and frameworks. Demonstrated expertise in both client side and server side architecture, logical and analytical problem solver.

WORK EXPERIENCE

Full-Stack Software Developer/ Mentor, Codementor - *September/2022 - present* - Lagos.

Codementor is the largest community for developer mentorship and an on-demand marketplace for top software engineers, developers, consultants, architects, programmers, and tutors. I have worked with a number of clients on the platform in developing, debugging, and reviewing several apps including:

⇢ Developed full-stack web applications to analyze and process data for different clients.

⇢ Reviewed code and codebases for clients for the purpose of optimization and keeping their codes up-to-date.

⇢ Helped secure applications and the ability to work, interacting with multiple APIs and databases.

⇢ Mentored clients on problem-solving approaches to software development and best programming practices.

⇢ Provided support via zoom to students and engineers around the world.

⇢ Completed over 100 jobs and mentoring sessions with 4.9/5 star ratings and good reviews including skill endorsements.

⇢ **Skills**: HTML/CSS, JavaScript/ES6, React, Git/Github, Node.js, Express.js, REST API, NoSQL, SQL.

Junior Software Developer , The Emirates College of Advanced Studies(TECAS)-

November/2019 - January/2021 - Ilorin, Kwara,Nigeria.

TECAS is a student-focused institution which is centered on coaching and rendering educational help/advice to high school graduates who wish to further their education to the tertiary level. It is one of the most popular institutions in Ilorin South.

⇢ I was part of the team which developed the full stack web app for the company.

⇢ I took part in the designing of the website's UI using HTML, CSS and Bootstrap.

⇢ Created the database of the company where the information of registered students were being stored and utilized.

⇢ Worked with the agile team in the maintenance and remodeling of the website to ensure smooth running and introducing new features for this time period.

SIDE PROJECTS

SendIT: SendIt is a parcel delivery web application that helps users send parcels from anywhere they are.
